

ASTROLOGY

Planetary Event Calendar for February, 2019

by Joe DiSabatino, M.Ed.

Here are the key astrological dates in February when the Sun and planets are forming significant aspects:

Note: All the planets are moving direct during February, so the time is ripe for moving forward with plans and projects.

- 1. February 1-2nd: Mars in stressful aspect to Pluto.** Anger and frustration could be stirred up due to someone's actions. A tendency to over-react is there. Some old wound may be getting re-stimulated, so it's helpful to pause and identify where the anger is actually coming from.
- 2. Feb 4th: New Moon at 15 Aquarius occurs at 4:03 pm in Myrtle Beach.** Align your New Moon wishes with the archetype of Aquarius: where in your life do you want to think, act and feel outside the box of your predictable patterns? Do something that opens new doors, puts you around novel people or situations.
- 3. Feb. 6-8th: Sun in Aquarius making a positive connection to Jupiter in Sagittarius.** Although not as strong as the Sun/Jupiter conjunction, still the energy during these three days supports whatever you are trying to achieve in any area of your life.
- 4. Feb. 11-15th: Mars conjuncts Uranus in the sign of Aries.** Dare-devil energy in the air!—the warrior Mars is in its own sign, hitting the rebel Uranus. A sudden, unexpected turn of events can take you by surprise. Down side of this aspect is too much speed and impatience. **Watch out for speeding tickets.**
- 5. Valentine's Day is Feb. 14th: Venus, the love planet, is in the serious, committed sign of Capricorn all month and it conjuncts Saturn, the ruler of Capricorn Feb 16-18th.** Saturn usually disappoints, slows down, restricts. Although it's a good time for long-term commitments, even marriage proposals, if they are offered. But break-ups are possible also. Saturn/Venus contacts make us face the reality of what's really happening in a relationship rather than holding onto fantasies/delusions.
- 6. Feb 15-18th: Sun in Aquarius makes a positive contact with Uranus, the ruler of Aquarius, in Aries.** Another period, similar to the Mars/Uranus conjunction earlier in month, for doing something new, taking a risk, stretching the envelope in any area of your life. You'll be glad you did.
- 7. Feb. 17-19th: Mercury conjuncts Neptune in Pisces.** Your imagination and creativity are stimulated. Read some poetry that inspires you. Take a long walk on the beach. Write a poem or a song.
- 8. Feb. 21-23rd: Venus conjuncts Pluto in Capricorn.** This is called a "super-aspect"—it gives financial success if a new business is started on these days. If you're born with this

aspect, you possess innate business savvy. Since Pluto rules Scorpio, this aspect by transit or in a natal chart, intensifies passion and sexuality. In a woman's natal chart, it's the Mata Hari aspect, particularly if it occurs in a fire or water sign. If there's a Pluto/Venus strong aspect in Scorpio, a woman or man will possess a strong magnetic and sexual aura that draws the opposite sex like bees to honey, without a word being said. If Venus and Pluto connect in a man's natal chart, he'll be drawn to Pamela Cruz types—the fiery Spanish lover. In the sign of outwardly reserved Capricorn, you can be sure there's more passion and emotional intensity there than meets the eye.
